Lab Assessment-2

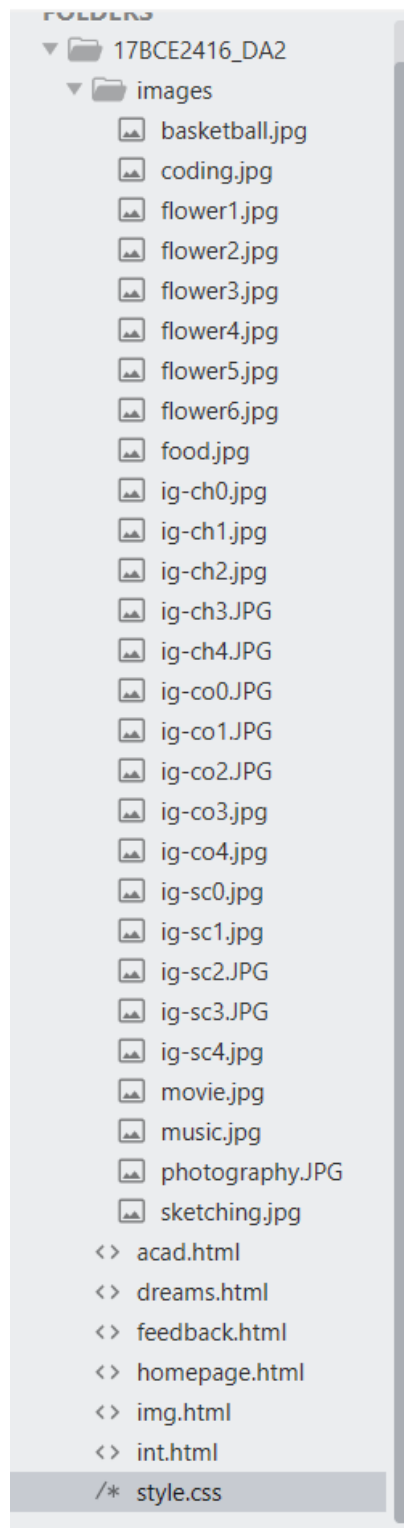

-17BCE2416
Navya RG

Create webpages to display the following information's about you.

- **Home page (use html semantic elements - navigation to other pages, article about you)**
- **Academic proficiency (Tabulate and list your proficiency)**
- **Interest and Hobbies (Min 5 - image and explanation)**
- **Dreams (Min 5 with description or plan)**
- **Image gallery (Min 10 pics)**
- **Feedback or comment**

Use HTML 5 with CSS.

File Hierarchy:

style.css

```
body{
    margin: 0;
}
.amatic{
    font-family: 'Amatic SC';
}
nav{
    font-family: 'Amatic SC';

</div>

<article>

<p>

Flipping through the pages of my life, I find myself watching my father in amazement when he talks about his work. Growing up in a family full of engineers developed my interest in the field. Being a keen observer with an inquisitive nature is what I am. There were nights when I used to keep pondering over questions and could not sleep without my curiosity satisfied. They were like bed time stories. Once my elder brother showed me how a fan works with a motor from a toy car. This made me open up all toys that worked on battery. I realized how simple everything was with a bit of understanding. I loved working with my hands and throughout my childhood I made a lot of things that today I realize uses concepts from Sciences. Creating new technology to make life simpler is something I aspire to do.

</p>

<p>

My introduction to computers at quite an early age helped in computer science always being an area of interest for me. My passion for music, art and sports developed over the years I spent in one of the best schools in the country, The Lawrence School, Lovedale. I have represented my school in basketball tournaments. I had an opportunity to visit a high school in South Korea and it provided me with a lot of insight into their educational system. I understood that it was a lot more stressful than mine. To be at the top consistently takes a lot of effort. I had to keep myself motivated at all times. As I don't need someone to encourage or push me to do something, I decided to compete real hard with myself. I keep setting targets for myself and work towards achieving them. My success motivated me and my failure didn't discourage me.

</p>

<p>

After I finished my schooling, I ended up in VIT, Vellore in the branch of Electronics and communication. As my rank was not good enough, I did not get the course of my choice which was Computer Science and Engineering. So, I decided to work really hard and migrate to Computer Science which was able to. I am currently in the junior year and I hope to continue studying further after my undergraduate. As basketball has always been driving

force for me for the past couple of years, it helped me get into the University basketball team and a chance to represent VIT in various tournaments.

INTERESTS & HOBBIES

BASKETBALL

I have been playing basketball for the past 6 years and it has been an integral part of my life. It started out with me trying out the sport for fun and then actually liking it. Basketball can be a great way to take my mind off the stress and not to mention participating in tournaments and meeting other teams. It can be a whole new experience every single time.

GAINING NEW TECHNICAL SKILLS

Yearning to learn new things have always been one of my inbuilt characteristics that can be seen from when I was a child. Once I started exploring the ocean of software development technologies, it turned into a great interest to me.

WATCHING MOVIES

Watching movies after exams or on a sunday morning is one of the greatest get-aways. binge watching movies and tv shows is a hobby that I developed in college which has proven as a distraction in good as well as bad ways.

LISTENING TO MUSIC

When i feel low or really pumped up, music is always the answer. It can help in lifting my mood or calm me down depending of the genre.

SKETCHING

Sketching/ painting was one of my favourite hobbies when I was younger. It helped develop my creativity from a very young age. Although i this hobby of mine has turned into something I rarely do, it still remains an area of interest for me.

PHOTOGRAPHY

Photography was a rather brief fling in school, but, I really enjoyed it while it lasted and would love to get back into it.

EXPLORING STREET FOOD

Saved the best for the last! Delicious food is something that makes everyone go crazy over it. When it comes to street food, it is needless to say how mouth-watering it can be.

    <h1>Become a 9 pointer:</h1>
    <ol>
      <li>Study whatever whas taught in class every night</li>
      <li>Don't procrastinate finishing DAs</li>
      <li>Study for quizzes with equal importance given to CATs
and FAT</li>
    </ol><br>

    <h1>Start preparing for placements:</h1>
    <ol>
      <li>Study from geeks for geeks for 3 hours every week</li>
      <li>Work on 2 challenges from hackerrank per week</li>
    </ol><br>

    <h1>Get a super dream placement:</h1>
```

Every engineers dream is to get placed in a super dream job or get into an Ivy League college. My dream is the former and to realize it, I need to start working on it from my 3rd year. So, I need to work on my aptitude, programming skills and communication skills.

<h1>Learn Photoshop:</h1>

Watch youtube tutorials for an hour every week

Practise for an hour per week

Replicate pictures

<h1>Become better at basketball:</h1>

Go for practise 15 minutes early and work on skills

Stop drinking aerated drinks

Stop eating junk food

Maintain a healthy diet

MY GOALS

BECOME A 9 POINTER:

1. Study whatever whas taught in class every night
2. Don't procrastinate finishing DAs
3. Study for quizzes with equal importance given to CATs and FAT

START PREPARING FOR PLACEMENTS:

1. Study from geeks for geeks for 3 hours every week
2. Work on 2 challenges from hackerrank per week

GET A SUPER DREAM PLACEMENT:

Every engineers dream is to get placed in a super dream job or get into an Ivy League college. My dream is the former and to realize it, I need to start working on it from my 3rd year. So, I need to work on my aptitude, programming skills and communication skills.

LEARN PHOTOSHOP:

1. Watch youtube tutorials for an hour every week
2. Practise for an hour per week
3. Replicate pictures

BECOME BETTER AT BASKETBALL:

1. Go for practise 15 minutes early and work on skills
2. Stop drinking aerated drinks
3. Stop eating junk food
4. Maintain a healthy diet
